French Study 4/2020 Spike Protein DNA Testing Confirms Spike Protein is identical to Cobra Venom (Cobrotoxin) and Krait Snake Venom Protein (Bungarotoxin) and similar to Rabies Virus Genetics also. Also confirms that nicotine is an antidote and why because nicotine binds to same cell receptors as these venoms do and bind more powerfully than venoms and this is why smokers are less affected by COVID than non-Smokers

Showing names of two scientists.. Katalin Kariko and Drew Weissman as Creators of mRNA Covid 19 shots

<https://www.pennmedicine.org/news/news-releases/2021/september/penn-mrna-scientists-drew-weissman-and-katalin-kariko-receive-2021-lasker-award>

Katalin Kariko Article states in first paragraph that 1978 was first year they confirmed proteins could be made from injecting mRNA into a mammal cell, then next sentence states that in 1984 first use of PLASMIDS to deliver RNA and create the mRNA tech successfully in mammals.. DNA Plasmids are in the COVID 19 Shots!

[https://www.jstage.jst.go.jp/article/kjm/71/1/71\\_71-001-ABST/pdf/-char/en](https://www.jstage.jst.go.jp/article/kjm/71/1/71_71-001-ABST/pdf/-char/en)

**Katalin Kariko and Drew Weissman Study from 2011 starts with “Nucleoside modifications...” This study is funded by NIAID dept of NIH (Fauci’s Dept) to create “mRNA Gene Therapy shots”**

In their paper it reads twice, we use “snake venom phosphodiesterase” to cleave the RNA of the mammal.. screen shot included...( also mentions that multiple RNases are used to cut RNA also.. this is important, check out article below from Bentham Science and their quote about RNases) <https://academic.oup.com/nar/article/39/21/9329/1093548?login=false>

Innovative research product page for researchers to buy SNAKE VENOM PHOSPHODIESTERASE to make mRNA Gene Therapy shots like the two scientists from Univ of Penn..

On the product page it says DO NOT mix this snake venom component with Glutathione, Cystein (N-Acetyl Cystein). Vit C (ascorbic acid), and that it is COMPLETELY INHIBITED by EDTA!

<https://www.innov-research.com/products/snake-venom-phosphodiesterase-i-purified-lyophilized>

Bentham Science article on snake venom Phosphodiesterase, all the trauma to a human is listed and ARE the exact reported vaccine injuries to covid shots and second screenshot tells you that RNases and Phosphodiesterases are UNIVERSALLY FOUND IN SNAKE VENOMS!!!!!! The 2011 paper above says they use both Snake Venom Phosphodiesterases and RNases to cleave our RNA in these shots!

Also highlight the screen shot from inside this paper that EDTA is an inhibitor or protective detoxing agent against almost ALL Snake Venom Phosphodiesterases.. all people that got these shots should be on EDTA at a minimum!!

2017 Study titled Antiviral Activity of Animal Venom Peptides

1. They highlight that Snake venom components are similar (homologous) to HIV-1 spike protein. WHAT!!!
2. Highlight the conclusion of this paper.. mentions that Animal Venom Peptide Vaccines are necessary to address all future worldwide pandemics and that “animal (venom)

peptides represent an essential scientific investment for protecting and perpetuating humankind.” Really, who would have thought that deadly venoms laced vaccines were required to preserve mankind... psychopaths....

3. Also I screen shot all of the current patented Venoms from which creatures are patented as vaccines and drugs to treat which “viruses” already!!! Scorpion venoms, frog venoms, snake venoms, insect venoms, and marine sponge venoms... disgusting.

NIH document titled COVID-19 mRNA Vaccine Production “they state that the ‘spike protein gene’ they chose as their vaccine candidate, and they inserted it into a DNA Plasmid and that’s how they made the shots..... oh really the spike protein gene was found to be cobratoxin and bungarotoxin from the krait snake in April of 2020 by French geneticists. There is definitely venoms in these shots.

<https://www.genome.gov/about-genomics/fact-sheets/COVID-19-mRNA-Vaccine-Production>

2003 paper.. title starts with “In Vivo Trans-splicing...”

These scientists took 2 halves of the cobratoxin protein, put half inside of two different DNA plasmids...injected them separately into animals and nothing happened... then they injected both DNA plasmids containing half of each of the cobratoxin protein and declared.. that within 6 hours.. all the mammals (mice) died... and they discovered that inside the cells of the animals, they combined the two DNA plasmids and SPLICED the two cobratoxin venom proteins together and then released the “mature a-cobratoxin mRNA” into the animals blood and the king cobra venom protein killed 80% of the mice in 6 minutes and the rest by 6 hours.. confirming that DNA plasmids could tell a mammal cell to make the deadly cobra venom inside its own body and cells!!! This explains why Pfizer and Moderna shots had to be given in two different doses over 2 weeks, and why 80% plus of all people that died from the shots died within 48 hours of the second shot... also confirms why Pfizer and Moderna had color coated the tops of the first and second shots that were to be administered, why they were designated with different color tops.. 1st shot by Pfizer was a gray top, and second shot was a purple top... if they were identical, why would they have to be designated different with different color tops.. this explains why these shots had to be given in two doses... two different DNA plasmids, that when combined the bodies of the humans would cause their bodies to make mature Cobratoxin mRNA that would kill them. This paper confirms they figured out how to make a human cell make venom and then orchestrate death to itself!!! Pure evil

#### Cloning and Expression of Alpha-Bungarotoxin (Krait) Gene

1999 paper showing how they put bungarotoxin (spike protein of covid virus) into a plasmid, and got E. Coli bacteria to manufacture the venom for them.. this is happening all around the world causing vaccinated injuries and the weaponized venom manufacturing bacteria is then contagious, causing what you hear is called SHEDDING... once the venom manufacturing bacteria E. Coli is programmed with the plasmid to make venoms, it forever makes the venom as long as it has blood sugar feeding it.. then those injected with Covid shots, share their bacteria with loved ones, through saliva, sweat and sex and breastfeeding, and once the bacteria is inside of the new person, they start having the symptoms of the venoms the bacteria is releasing inside of their bodies now!!!

<https://pubmed.ncbi.nlm.nih.gov/12136173/>

This paper demonstrates how they weaponized CONOTOXINS using plasmids also.. this is the machinery they used around the world to make people sick and call it a respiratory virus, it never was that... they have dispersed in the air, our water, food and vaccines, DNA PLASMIDS carrying the toxic venom spike protein instructions into all facets of our lives to make us sick!

1. Important, I highlight in this study in a screenshot that VENOMICS owns this massive library of snake venoms made in E. COLI but that the type and names of the venoms “cannot be disclosed in publications”.. oh really Jason Shurka, why not...slide 194...slide 195 reads... “While the exact sequence of the 4992 (venom) peptides of this study remains confidential” ... this is why MDs can’t figure this out.. the venom aspect of covid, and drugs and vaccines..

1956 By Stanley Cohen and Rita, Study Snake Venom Causes “Nerve Growth Factor”, explosion of Neurological tumor growth when exposed to snake venom Phosphodiesterase (the same venom in the mRNA shots used to cleave our RNA, per Katalin Kariko and Drew Weissman Papers)

<https://www.nature.com/articles/s41593-021-00949-8>

Slide 216 declares “ther snake venom factor, tested....,have a specific activity approximately 1000 times as high as the purest tumor fraction.” They took sarcoma cells (cancer cells) and compared them to the cancer growth formation of snake venoms.. and snake venoms was 1000X more powerful at causing tumor growth in Neurological (Brain and Nerve) tissue!! This same guy won a nobel prize in 1986 for this disturbing discovery... this is why we have turbo cancers exploding since the covid shots.. they have snake venoms and instructions to make snake venoms in them, DNA Plasmids!!!

This paper is KEY!!!!!!!!!!!!!!!!!!!!!! Must show audiences. THIS IS WHY SO MANY PEOPLE ARE GETTING BRAIN CANCERS AFTER THE SHOTS FOR COVID!!!!!!

During the pandemic they injected Conotoxin (cone snail venoms) and Cobratoxin (spike protein of covid) into mice... within minutes the venoms crossed the blood brain barrier and created GLIOBLASTOMAS (brain tumors in less than 72 hours!!! Then they turned around and injected these animals with 2 different doses of ONLY nicotine to see what happened... at 1.0microL/mL of blood the nicotine had reduced the tumor size by over 50 percent!!! Then they stopped administering the nicotine!! The other lower dose had NO EFFECT on the brain tumor created by the venoms...NOW HIGHLIGHT IN THE ABSTRACT, the summary at the beginning of the paper... THEY MAKE NO MENTION OF THE NICOTINE DOSE THAT REVERSED THE TUMOR IN 72 HOURS!!!! Ask yourself why. Would they not even mention the curing does of nicotine... and ask yourself why they would only put in the summary that they used a smaller dose of nicotine for 72 hours that had NO EFFECT!!!! In the study they show the brain tumor being obliterated by the higher nicotine dose!!! To hide the cure JASON!!!

In this study they hammer continuously that alpha 7 nAChR (nicotine receptors) are the target of these venoms just like covid spike proteins... and that when the venom binds to the nicotine receptors CANCEROUS growths immediately start to form!!!

This is the link to the study!

<https://www.mdpi.com/1660-3397/19/2/118>

In this same article they reference nicotine receptors are responsible for explosive number of lung cancer, breast cancer and stomach cancers and I highlight published articles about each of these cancers and their increased diagnosis.. even since covid and the shots! Slide 245 shows in the article referenced above in this document... How I know they are creating Miscarraiges with these snake venom laced vaccines... in that paper they highlight a snake venom component said to have AntiViral Property and it is called L-amino acid oxidase abbreviated LAAO or LAO.. I highlight the statement on slide 247 that LAO “inhibits Syncytium formation”. The following slides and links show what Syncytium cells are and why if you INHIBIT them you can 100% cause a miscarriage to occur when you inject this snake venom LAAO/LAO.

Syncytium is the cells that form the Placenta, and attach placenta to the Uterus of the mother.... Kill Syncytium, the placenta pulls away from the uterus (picture syncytium is the Velcro keeping the placenta attached to the uterus). After a few weeks of pregnancy the syncytium forms cells called Syncytiotrophoblasts... these cells manufacture PROGESTERONE HORMONE for the REST of the Pregnancy... if you inject this snake venom LAO into a pregnant woman, you kill Syncytium cells, which in turn can not make Syncytiotrophoblasts which can no longer make progesterone and every pregnant woman needs PROGESTERONE to either get pregnant at all and MUST HAVE THIS HORMONE TO MAINTAIN PREGNANCY TO FULL TERM!!!! PROGESTERONE IS CALLED THE “PREGNANCY HORMONE”! Stop making progesterone, you miscarry.. period!!! Millions of pregnancies have been lost after the covid shots regardless of length of the term of the pregnancy.. this is how they are doing it!

be rapidly deployed and are cheap to manufacture....remember Operation warp speed, fast
